

TAGPROTOCOL

Collect #hashtag NFTs and mine Tagcoin based on Twitter hashtags popularity.

Blockchain-Based Non-Fungible Token

What is a #?

And why is it so important?

What is a #?

We see hashtags all over our **social media networks**. However, there are still many people who don't really understand what hashtags are, what their purpose is and the benefits that come from using them.

Let's begin by defining what a **hashtag** is:

Hashtag (on social media sites such as Twitter) a word or phrase preceded by a hash or pound sign (#) and used to identify messages on a specific topic.

'Spammers often broadcast tweets with popular hashtags even if the tweet has nothing to do with them.'

source: [wikipedia.com](https://www.wikipedia.com)

Where do you use #?

Hashtags are most commonly used on social media platforms. You'll find them all over on: **Twitter, Facebook, Instagram, LinkedIn, YouTube, Tumblr** or **Pinterest**.

- Sometimes people use **hashtags** within sentences of their post updates.
- Other times, hashtags are added at the end, as a way to **help categorise** the post.
- They allow you to **quickly find** other posts related to the selected topic.

TAGPROTOCOL INTRODUCING

Non-Fungible Token is a digital file (token) that represents the **unique identity and ownership** of a particular asset (often a collectible item) verified on blockchain.

NFT Market

You can now own a piece of internet history...

... for just
\$200
per hashtag ...

... and **earn** from it!

Which #hashtag
would you like to
OWN?

How does it work?

Get a #hashtag

Find a specific Twitter #hashtag you'd like to own

Register it on BSC

Register your chosen #hashtag* on the Binance Smart Chain

*Every registered hashtag is a unique NFT

That's it!

Mint your very unique NFT which will be yours forever unless you decide to sell it!

NFT Hashtag Staking

Tagcoin Exchange

Tagcoin
TAG

Binance Coin
BNB

- Immediately **exchange** your Tagcoins to BNB/BUSD or any other cryptocurrencies at any time you want.
- **Provide Liquidity Pool** in TAG/BNB pair at the exchange and earn more Tagcoins while **holding** your assets.
- Use the price difference and trade your Tagcoins to **earn even more!**

Hashtag Auction

Trade #Hashtags on the open market whenever you want.

Sell your #Hashtag any time you want to exit, or buy more #Hashtags to enjoy a **higher** daily passive income.

Tagcoin (TAG)

Tagcoin is a unique, native **cryptocurrency** of the Tag protocol. It has a pre-defined, limited production rate and a limited supply - similar to Bitcoin or Ethereum. This is to establish it as a **Store of Value** asset.

Tagcoin Production Rate

Year	Hourly	Daily	Yearly	Circulation	Inflation
One	1000	24,000	8,760,000	8,760,000	100 %
Two	500	12,000	4,380,000	13,140,000	50 %
Three	250	6,000	2,190,000	15,330,000	16.66 %
Four	125	3,000	1,095,00	16,425,000	7.14 %
Five	62.5	1,500	547,500	16,972,000	3.33 %
Six	62.5	1,500	547,500	17,520,000	3.22 %

Tokenomics

Tagcoin distribution

Beneficiaries	Share	Amount
Tagcoin Staking Pool	80%	800 TAG
Liquidity farming	5%	50 TAG
Hashtag Performance Oracles	5%	50 TAG
Tagchain Validation	5%	50 TAG
Tag Foundation	5%	50 TAG

Please note:

1,000,000 Tagcoin will be pre-mined

Distribution:

100,000 Added to Liquidity pools to jump start trading

400,000 for the Development Fund

500,000 for the Marketing & Promotions Fund

TagProtocol Technology

Smart Contract

Automatically executes all transaction agreements. It means that there is no third party or a “Boss”, who executes your payouts. Everything happens automatically. **You are 100% in control of your funds** as the smart contract automatically executes 100% of your passive income and commission payouts.

DAO

DAO stands for **Decentralised Autonomous Organization**. In simple terms, a DAO is an organisation that is run by computer code and programs. it has the ability to function autonomously, without the need for a central authority.

DECENTRALISED REFERRAL PROGRAM

Decentralised Referral Program

Tagprotocol's decentralised referral program is designed so that you can earn from **UNLIMITED** depth in the blockchain.

- You receive your bonus **INSTANTLY** and straight to your digital wallet. It's executed by a smart contract regardless of depth!
- **The most important** thing to keep in mind is your **RANK** in the decentralised referral program.
- ⚠ A Higher Rank **equals a Higher Payout** from your team.

Rank	Total Hashtag Team Sales	Total Team Sales	Commission
1	0	\$0	25%
2	10	\$2000	30%
3	100	\$20,000	35%
4	250	\$50,000	40%
5	500	\$100,000	45%
6	1,000	\$250,000	50%
7	10,000	\$2,000,000	52.5%
8	25,000	\$5,000,000	55%
9	50,000	\$10,000,000	57.50%
10	100,000	\$20,000,000	60%

How does decentralized referral program work?

Your Direct Sales: **25%**

Your Indirect Sales (Team):

**Rank Referral Comm. % =
Your Overriding Commission**

Ex. Your Rank 4 (40%) –
Downline Rank 1 (25%) = **15%**
(e.g., \$10K you get **\$1,500**)

Conclusion

- 1 Tagprotocol is the **first, unique data driven NFT**
- Daily Rewards are Based on Twitter #Hashtags performance
- 2 You own your miner (#Hashtag NFT) **forever and enjoy hourly output**
- 3 All transactions **are safely and instantly executed** by a smart contract
- 4 Storing inflation Tokenomics to **maximise** earning potential
- 5 No pre-mine or pre-sale available. **Fair game for everyone**
- 6 Tagcoin is designed to become a **Store of Value**

Project's Roadmap*

Disclaimer

Cryptocurrency & Blockchain projects are high risk operations because of their experimental nature. By participating in this project, participants declare to understand and assume the following risks:

- The lack of regulation: the purchaser agrees not to benefit from any guarantees associated with presale on regulated financial markets or other regulated financial investments.
- Capital loss: the purchaser accepts the risk of a total or partial capital loss in cryptocurrency or in the token.
- Volatility or market risk: the value of tokens, just like that of cryptocurrencies in general, can be extremely volatile and subject to significant, and largely unforeseeable fluctuations. Moreover, the market or markets on which these tokens are traded do not offer the same guarantees that are generally applicable to conventional financial markets.
